Versatile and detail-oriented Frontend Developer with years of expertise in React, JavaScript, Bootstrap, CSS and HTML to deploy all types of responsive client and server-side projects. Hands-on experience using testable software designs, building web applications and documented success in coding websites and reviewing & implementing third-party scripts. Adept at working with hybrid app frameworks like React to successfully execute cross-platform UI interfaces and create high-presentation UI with exceptional handling to enhance user experience.

Experience

Mr.Highline

01/21 - 11/22

Frontend Developer & UI Designer

- Promoted the development team both internally & externally and ensured that creative solutions, tight code, and challenging problems solved were called out appropriately to the developer community.
- Designed high-fidelity and low-fidelity prototypes using Adobe XD and Figma Design and developed responsive user interfaces for modern devices using HTML, CSS, SCSS, Bootstrap, JavaScript, and WordPress.
- Collaborated with design and UX teams to improve usability and design of products and designed wireframes & prototypes based on goals and needs for the organisation.
- Provided solutions and recommendations for resolving technical issues and ensured solutions met the technical specifications and design requirements.
- Designed and built a new website for the small fleet clients and the maintenance of the latest online platform.

OlaDavid Consultancy

06/19 - 12/20

Web & Graphic Designer

- Collaborated with clients in a cross-functional environment and performed an analysis based on requirements and technical analysis.
- Built the user-friendly client-side interface for several projects using JavaScript, CSS and HTML and interfaced with clients to determine marketing & design vision, define scopes of work, and establish budgets & deliverables schedules.

TKFCare Charity

03/17 - 05/19

Web Designer

- Ensured compliance with approved design standards to provide quality design, safety, constructability, reliable operation, construction economy, and operating convenience.
- Reviewed and verified calculations, design models, drawings and documents for quality, accuracy, neatness, functionality, and satisfactory completion.
- Collaborated with project managers and senior engineers to establish practical solutions to problems coupled with tasks of developing and maintaining high-end web applications.
